

METROPOLITAN PERTH APARTMENT DEVELOPMENT REPORT AUGUST 2015

Metropolitan Perth is in the middle of a wave of record apartment development.

A focus on infill development, and increasing awareness of urban sprawl, will see apartments account for over 15% of new dwelling construction by the end of 2016.

Y Research's Metropolitan Perth Apartment Development Report is Perth's longest running and most comprehensive report on Perth's apartment development pipeline. The independent Report is widely used by the State Government, developers and builders.

The August 2015 edition covers over 300 apartment projects either under construction, development approved or mooted across metropolitan Perth. Upon completion, these projects could add over 20,000 apartments to the Perth market by 2020.

The Report covers:

- > The Perth Apartment Development Pipeline between 2014 and 2020;
- > Development hotspots at a suburb and regional level;
- > Trends in building heights, development scale, room sizes and product offerings (1, 2 and 3 bedrooms);
- > Market pricing; and
- > Current pre-sale and post completion sale markets.

PURCHASE OPTIONS

To order a copy of the Metropolitan Perth Apartment Development Report, complete the form on the following page.
