INVITATION TO ATTEND A
FORUM
ON THE HIGH-RISK WORK
QUALIFICATION REVIEW

Artibus Innovation is running forums across the country to hear your views on the design of the High-Risk Work Qualifications. Click on any of the locations to register. These events are free to attend and are an important part of the review of these qualifications.

For further details on this project click [here](#)

We are constantly updating our website with information about all the projects we are working on. Each project page details the project status and provides access to all the draft documentation and, where applicable, registration for events and feedback surveys.

Case for Endorsement – High Risk Work Qualifications

Project Contact: David Thompson | thompsond@artibus.com.au

This Case for Endorsement project aims to transition CPCDB units of competency to the 2012 Standards for Training Packages. This includes:

- Reviewing the content of the units for relevance, usability and quality.
- Removing duplication
- Complying to the policy and standards for training packages

The components that are in scope for this project will be developed in context of:

- the transitioning of the High Risk Work Licence units of competencies
- the transitioning of the Concreting, Demolition and Post Tensioning units of competency
- the review and development of the Dogging, Rigging, Scaffold, Steel fixing and Crane Operations units of competency
- feedback from Industry about inconsistencies in the use of units of competency across these components
- the CPC and CPCDB training packages including other qualifications which share these components

The Case for Endorsement and revised Companion Volumes are scheduled to be submitted to the Department on or before **1 December 2017**.

This project is running a series of forums across Australia. The forums provide an ideal opportunity to present your views regarding the design of the existing national training package components being reviewed in this project. The forum will be attended by representatives from peak industry bodies, unions and other key stakeholders. We encourage all interested parties to attend. **Forum Registration**

Qualifications:

Code	Title
CPC50511	Certificate III in Dogging
CPC50711	Certificate III in Rigging
CPC50911	Certificate III in Scaffolding
CPC51111	Certificate III in Steel Fixing
CPC52912	Certificate III in Construction Crane Operations
