

Are your assets **safe?**

We all try as best as possible to protect ourselves, our families and our personal assets. But what about our businesses and business assets? Are our arrangements with contractor's water tight to prevent the ATO or the Office of State Revenue from making a large claim against the business? Are our business assets appropriately registered to prevent a liquidator from getting their hands on them?

With the recent failures of prominent construction companies and cash flow being a major issue for many in the Building and Construction industry, business owners need to ensure that they and their assets are as safe and secure as possible.

Come and join us to learn how you can protect yourself. There will be time for questions, networking, food and drinks as well as a live telecast of the West Coast Eagles and Sydney Swans.
